

Updating your Turicum Authenticator App on Android

Android devices update to v1.17

To update your Turicum Authenticator App visit the Play Store on your Android device. 

Search for the app “Turicum Authenticator”

Tap on the app to see more information. Here you will see two options, “Uninstall” and either “Open” or “Update”.

If the “Update” option is available, tap on this and update the app.

If the “Open” option is available rather than “Update”, you might have “auto-update” enabled and the app has already been updated.

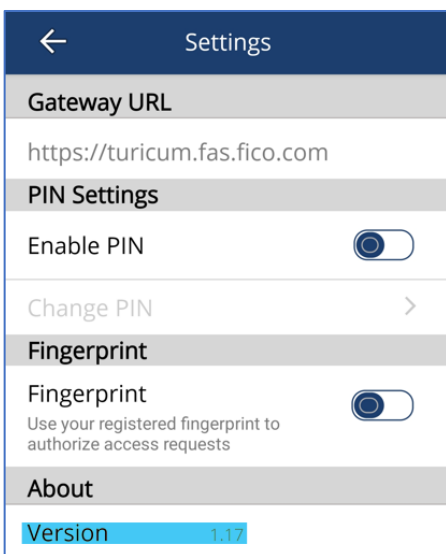

To check this tap on “Open”

This will now open the Turicum Authenticator App. On the top right of the screen tap on the “Settings” icon.

Under the “About” section you will see the “Version”

The latest version for Android is v1.17
