

## Employment Opportunity

Due to successful business expansion, the following new employment opportunity has arisen within our institution:

### **Application Integration & Support Engineer**

To provide comprehensive support for all Production and Back Office applications.

Responsibilities will include:

- Build relationships with software development team to gain an understanding of application architectures, required functionality and plan appropriate acceptance test scenarios
- Provide integration environment, technical knowledge and experience during the planning, execution, and management of integrating new applications into the existing application environment
- Assist with identifying opportunities to enhance or improve business processes via integration, or, as necessary, minimize the impact of integration on those processes
- Develop an in depth working knowledge of the banking systems components and configuration
- Cross training / knowledge transfer to other team members
- Improving end user's application awareness

The ideal candidate will need to have the following skills:

- An analytical approach, ideally with at least 3 years previous experience of supporting and testing bespoke applications preferably in the finance sector
- A strong working knowledge of SQL Server and scripting
- Competency with XML constructs and Schemas
- Confidence and experience with API protocols and schemas such as SOAP and REST
- Experience with business and technical requirements analysis, business process modelling/mapping and methodology development and data mapping
- Advanced Excel skills

If you think that you are suitable for this position, please send your application with your current CV to:
